

3D DINING CHAIR - WOOD BASE

COLLECTION GUBI

DESCRIPTION

The GUBI Chair by Komplot Design is the first furniture design to be based on the innovative technique of moulding three-dimensional veneer. The 3D design gives the chair a comfortable seat and a sense of lightness as all edges are pointing away from its user. The stunning design encourages for personalization with numerous base options as well as an inviting upholstered front in a fabric or leather of personal choice. In this way, the chair explores the contrast between soft and hard. Since its launch in 2003, the GUBI Chair has won several design awards and is included in the permanent exhibition at the Museum of Modern Art (MoMA) in New York.
