

ALABASTER GELULE SCONCE

COLLECTION
OZONE

DESIGNER
JOSEPH DIRAND

DESCRIPTION

Following its success in pale gold, the Gélule sconce designed by Joseph Dirand is now presented in white alabaster. This new version was imagined by the architect for the project of an exceptional yacht. It reflects the Joseph Dirand style through its minimal but original shape, and also through the choice of the material and its particular shade. Cut from solid alabaster, the new Gélule combines the rare know-how of Ateliers Saint-Jacques with the precise technical developments made by the Ozone studio. As if suspended in the air, it illustrates the enchanting power of alabaster by diffusing a floating and soothing light.

MATERIALS

Metal
