

## CUBE SINGLES AND CLUSTERS

**COLLECTION**  
STACKLAB

**DESIGNER**  
JEFFREY FORREST

**DESCRIPTION**

The original, award-winning Cube Collection transforms the industrial legacy of sand-cast metal molding into modern functional pieces. Using molds that incorporate quarter sections of a decommissioned historic wooden water pump pattern, each of the four 16" x 16" x 16" Cubes are cast in Engineered Cementitious Composite (ECC) — a blend of recycled glass and fiber. These versatile objects can be used on their own, or in flexible cluster formations serving stool, bench, or table programs. The option of 24 karat gold gilding can accentuate the industrial imprints on the Cubes, paying homage to its roots. With sustainability as the cornerstone, over 90% of the materials are non-virgin.

**MATERIALS**

Engineered Cementitious Composite, 24K

**FINISHES**
