

## EMBRUN S

### COLLECTION OZONE

#### DESCRIPTION

The invisible complexity of the internal structure firmly holds the fixture and diffuses a homogenous light, surprisingly filling up the stone volume. White onyx was chosen by the two designers for its unique diffusing properties and enchanting texture. Like a stream, it is sometimes bubbling, sometimes fluid and always translucent. In addition, the Onyx stone is said to bring confidence and protection. The diffuser is in visual balance on a clean-lined structure made of blackened brass, evoking a medieval assembly. Between the large chandelier and the vertical sconce, the suspension Embrun S finds its function on the bedside table or in an entrance. The pendant light is part of the Embrun Collection created by Etienne Gounot and Eric Jähnke, the Co-founders of Ozone.

#### MATERIALS

Metal

#### COLOURS

Honed White Alabaster

#### FINISHES

Dark Patinated Brass with Honed White Onyx
