

LOMA CONSOLE TABLE

COLLECTION REFRACTORY

DESCRIPTION

The Loma series interprets the mountains in our memory and the subconscious longing for vertical landscape that grows under the surface when absent from our daily experience. Loma activates the underside and interior faces of functional objects with vertically textured profiles that in turn shape the open space underneath. The cast bronze forms encourage traveling contact and continuous discovery as well as serving as a canvas to explore time-evolving patinations. The Loma Console is a sculptural table entirely cast in bronze. With diverse form features on every side, it can be oriented alternatively.
