DESCRIPTION

Cones, cylinders and parallelepipeds combine and tune like the harmonies of a score of contemporary music. Perfect shapes with contours that change, as does the perspective from which they are observed. Each shape generates others, through the shadows and lights it draws around itself: thus space acquires a metaphysical value thanks to the furniture element that occupies, fills and redesigns it. But it is the material that is the protagonist, along with the unique and unmistakable way in which it is chiseled. The sanding gives solemnity and an almost archaeological charm to the elegant lightness of fibreglass, resulting in creations that appear to be firmly anchored to the ground, ready to welcome everyday life. An interweaving of ancient charm and avant-garde in this sculptural collection that catches the eye, surprises and enchants.
