

WISHBONE DINING TABLE

COLLECTION
STACKLAB

DESIGNER
JEFFREY FORREST

DESCRIPTION

The Wishbone Collection, developed by STACKLAB, was designed and prototyped almost entirely in digital space to limit waste during design development. Central to its identity is the signature cast metal leg - conceived using a novel algorithm and manufactured with regional partners within 150 miles of the STACKLAB studio, specializing in the production of machine parts for heavy industry. The Wishbone Dining Table and Desk offer the choice of domestic hardwood or ECC tabletops in a variety of sizes and shapes, each underpinned by two robust Wishbone legs in bronze, aluminum, or iron.
